

Jason Wong

Software Developer | Full Stack Developer

<https://jasonnwong.github.io>

Technical Skills

Programming

- JavaScript
- PHP
- Java
- HTML/CSS

Frameworks

- Angular
- Symfony2
- JQuery
- DoctrineODM

Software/OS

- Ubuntu/Linux
- Apache
- MongoDB
- Git

Education

British Columbia Institute of Technology

JAN 2014 – JAN 2016

Computer Systems Technology Diploma (Web & Mobile Option)

Work Experience

Wardell International

NOV 2016 – PRESENT

Software Developer

- Developed real-time built in chat feature using Symfony websockets
- Discovered and patched redundant API call bug reducing common load times by half
- Built widget customization interface to allow easy and rapid dashboard setup
- Ported front-end framework over from Bootstrap 3 to Angular Material

Technical Projects

Independent Project

APR 2016 – JUN 2016

Real Time Oil Prices

- Built a responsive, AngularJS based web app to display live oil and commodity stock prices
- Pulled live stock prices and quotes via query from Yahoo's finance API
- Integrated charts to visualize price changes over time using Google's chart API

Wardell International

APR 2015 – MAY 2015

Intern Software Developer (Team Project)

- Ported an Excel based management tool into a pure web based application
- Configured back-end persistence between MongoDB and Symfony2
- Created a responsive and fluid interface based on dynamic data modification, ease of use and scalability

Wearable Therapeutics

JAN 2015 – APR 2015

Intern Software Developer (Team Project)

- Developed web app to automate order processing and data entry into other web platforms (Salesforce, Canada Post, QuickBooks)
- Implemented pump add-on pop-up box, increasing overall sales by 1.5%
- Improved web store layout, design, SEO and added dynamic customer testimonial display
